

EARN POST-SECONDARY CREDITS IN HIGH SCHOOL
... and ...
GRADUATE READY FOR HIGH DEMAND JOBS

GRADUATE FROM HIGH SCHOOL WITH:

12-20 Post-Secondary Credits

Use a portion of your Promise scholarship funds while still in high school to obtain post-secondary credits ahead of the game. The remaining balance of your Promise scholarship will be waiting, if you choose to continue your education.

2-4 Workforce Certifications

Obtain stackable industry certifications to ensure that you are work-ready.

A Driver's License

A driver's education course will be provided so that you are able to compete for the jobs and post-secondary programs that require a driver's license.

Connections to Employers

Obtain the skills and training necessary to be eligible for high-needs jobs in our area. Gain connections to local employers to match your skills to the current demands of the job market.

Choice

Choose to enter the workforce directly from high school or take the post-secondary credits you've already earned and continue your education.

65% of available jobs in the Pittsburgh region do not require a 4-year degree.

The Pittsburgh Promise, the Career and Technical Education office at Pittsburgh Public Schools, Community College of Allegheny County (CCAC), and the Energy Innovation Center (EIC) are working together to offer a concurrent-enrollment option for all PPS students to take advantage of these opportunities. You can now use a portion of your Promise scholarship to earn post-secondary credits while still in high school and qualify for these high demand jobs.

This program allows you the freedom of choice. You will have the training and certifications needed to enter the workforce directly from high school or the advantage of continuing your education with transferable post-secondary credits.
