

Building Construction Technology

Brick Wall Building Competition #2

Competition Rules:

- same teams as competition #1
- teams have exactly 60 minutes for the task
- all tools must be clean and areas picked up daily

Walls to be judged on:

- Level and plumb corners/ends
- Level and straight leads (courses)
- Flush front wall plumb
- Neat, straight, and clean joints
- Overall clean and professional appearance
- Application of at least 2 types of bonds
- Workmanship, jobsite cleanliness, end of the day time management and clean up

-Judging of walls **will be** influenced the by number of courses this time. Bonds, and style will be considered but **quality** will still be the priority standard just like competition #1. You are now placed under real world jobsite time expectations. In the professional world you need to provide a superior quality product but rarely will you encounter having unlimited time.

Places and Prizes for 1st/2nd/3rd place
