PERFORMANCE ASSESSMENT FOR apply PVC primer and multi-purpose PVC glue to a PVC pipe joint.

In a real world setting and given all the necessary materials the student will properly apply PVC primer and multi-purpose glue to a given PVC joint. Student will use the proper PPE throughout this task and complete the task with 100 percent accuracy as per the given instructor rubric

STEPS/TASKS	MEETS STANDARDS	NEEDS IMPROVEMENT
1) All PPE is worn at all times in shop.		
2) Cardboard is laid on the floor to protect the work area from the primer.		
3) Primer is applied to both the pipe and desired fitting.		
4) The Pipe and fitting are marked for positioning and for insertion.		
5) The multipurpose glue is applied to both fitting and the pipe.		
6) The fitting is slide over the pipe and turned one quarter into place.		
7) The markings are checked to ensure they have been lined up correctly and that the pipe has been fully inserted into the fitting.		
8) Any excess glue is removed with a rag.		
9) Work area is kept clean throughout entire task.		

*** ALL STEPS/TASKS MUST MEET THE STANDARDS IN ORDER TO ACHIEVE MASTERY.***
